

LISTONE GIORDANO

Listone Giordano, the reference brand for high-end wood flooring, and Paola Lenti return to collaborate by betting on color. In fact, they present the new versions of PERIGAL, the original floor resulting from the encounter between the Umbrian company's rich knowledge of wood and the unmistakable stylistic code of the finishes of the famous designer. Inspired by a nineteenth-century mathematical theorem, Perigal is characterized by unusual geometric shapes and caressed by striking strokes of color, which leave the natural grain of the material visible. The geometric modules, developed to interpret the horizontal dimension of the floor, can now also be mounted on the wall, to become a singular boiserie. In addition to the shapes and finishes, the combination Lenti - Listone Giordano focuses entirely on colors, an aspect often overlooked by wooden floors. In this way, Perigal is tinged with the newest colors Water, Graphite, Oil and Teal with a touch of joy that does not compromise the innate elegance of the product.
