Charleston Sofa | MOOOI

(Tortona Design Week)

The Charleston is a classic, elegant and comfortable sofa symbol...upturned entirely on its head in an almost vertical position. This design, by Marcel Wanders, turns an existing classic into a modern, disruptive concept. Mounted on a rotating metal pedestal it is a perfect lounge chair that creates a jaw-dropping space (beware: very high ceilings are needed!) www.mooui.com

Perch Light | MOOOI

(Tortona Design Week)

Is there anything more captivating than a bird perched on a branch singing, flirting and celebrating life? No, but there is something almost as elegant: this light turns a beautiful stereotype into a family of lights including table, floor, wall and suspended models. Designed by Umut Yamac, the folded paper and brass birds are free to swing when softly touched. www.mooui.com

Girgenti & Craklé | Baxter

(Salone del Mobile)

Girgenti and Craklé are Baxter's first complete outdoor lines of furniture, both designed by Antonino Sciortino with clear nods to a 1970s aesthetic. The chairs, armchairs and accessories are made of tubular copper matched with hydro-repellent saddle leather. www.baxter.it

#9

Sciara | Paola Lenti

Designed by Marella Ferrera, the Sciara side table base is made of stainless steel finished with a special galvanic treatment made by De Castelli exclusively for Paola Lenti, and the top consists of lava stone and glass tiles. www.paolalenti.it

Eydo | LEMA

(Salone del Mobile)

A bold asymmetric fluidity defines the Eydo dormouse, designed by Francesco Rota. Inviting users to relax, it consists of a suspended structure in painted bronze and a seat and backrest volume that, recalling the lightness of a wing, envelopes and welcomes the body. www.lemamobili.com

MyEquilibria | Metalco Active

(Brera Design District)

The Brera Botanical Gardens displayed a high-tech, futuristic "tree" entirely dedicated to fitness. The Leopard Tree, designed by Vito di Bari, is a soaring seven metre central trunk with up to nine workout islands spread over 300 square metres at its base, where 30 people can train simultaneously. Its leaf designs are inspired by Voronoi diagrams, elegant arithmetic patterns based on nature. www.myequilibria.com
