

Paola Lenti at *I Chiostr*
Dell'umanitaria

Paola Lenti presented the new indoor and outdoor collections at *I Chiostr* dell'Umanitaria, a historic Milan institution renowned for its role in promoting arts and culture. The location is a former 15th century Franciscan monastery developed around four renaissance cloisters, with secret gardens and captivating spaces full of charm and history.

Paola Lenti turned this presentation into a unique opportunity. The Company decided to organise the event in a purposeful and responsible way: together with its partners, Paola Lenti started a restoration project of *I Chiostr*, that will continue, in the years to come, to give back to the city of Milan the revival of this historic location.

In these unique surroundings, Paola Lenti took one on a journey which allowed one to experience with all of the senses this year's collection, through a combination of colours, sounds, scents and objects.

Haven
Designed by Claesson, Koivisto, Rune
Sofa for indoor environments. The structure consists of a frame made of cataphoresis-treated and polyester-varnished steel covered with Rete and is available in cemento and grafite colours.

Sabi
Designed by Francesco Rota
Modular sofa for outdoor environments. The upholstery is directly hand woven onto the structure and consists of a waterproof profile covered with Aquatech or Rope braids.
