

Atrium

The Light Bell from Atrium is a suspended general lighting luminaire for indoor mounting. It has a high efficiency, latest generation LED light source and a low-loss technical thermoplastic diffuser. The luminaire housing is made of spun aluminium and is available in three finishes; a matt white external finish and silver anodised interior, a matt black external finish with gold interior, or a polished aluminium external finish with silver anodised interior.

Twentytree

The Matrioshka storage system is a collection of units that nest inside each other when empty, like the Russian doll it's named after. The system contains two wardrobes, three cabinets, two drawers and two sets of legs. Every component fits inside the largest wardrobe, with the partitions and legs housed in the back. This cuts down on shipping costs with no need for complicated assembly, even when moving house.

Jiefu Yu

The Pure table was designed for use by street food vendors in China, aiming to provide a better healthy eating environment. The table is built by hand without glue or screws, using only mortise and tenon joints to connect each part. Using biodegradable and 100 per cent recyclable solid wood, the table is designed to make cleaning easier as the stools can be hung underneath to clean the floor, instead of being placed on top.

Paola Lenti

The Frame collection from Paola Lenti is a series of chairs, armchairs, chaise longue, platforms, benches, side tables and additional modular elements, joined together by a stainless steel coupling system. The aluminium structures are upholstered with individual braids in rope or Aquatech yarns and plastic spacers. Removable cushion covers are available in Luz and Rope T fabrics, while seat and back cushions are suitable for indoor or outdoor settings in stress-resistant polyurethane or water-proof polyester with polyurethane inserts.
