

in material selection, comfort, and refinement, the maximum is being offered. The hairline finish of the stainless steel frame, the woodwork in carefully selected teak, its optimised ergonomics, the minimum relates to the lines of the design. Almost a pity to use outdoors.

114| HAVEN
Claesson, Koivisto, Rune, Paola Lenti
 The structure consists of a frame made of cataphoresis treated and polyester varnished steel covered with Rete and is available in cemento and grafite colours. Seat cushion and pillows with fully

removable cover are available in materials and fabrics suited to remain outdoors.

CABANNE: FROM CONTENT TO CONTAINER

Design Bestetti Associati, Paola Lenti
 Cabanne is an open project. It is the start

of a collaboration where Bestetti Associati and Paola Lenti explore the relationship between container and content. With the ultimate aim of combining Paola Lenti's unique style, plus simplicity of form and high tech materials designed to integrate with nature Cabanne is a contemporary architectural structure, designed to be the ultimate protection from the elements.

The selected materials are metal and wood. The metal is treated with innovative techniques to guarantee longevity and resistance to the elements. The iroko wood has been purposely left untreated to allow its natural evolution over time.

Cabanne is a modular system, allowing for endless possible architectural solutions tailored to the spaces, the situations, the requirements.

115| O-NEST
Tord Boontje, Moroso
 Rotationally moulded polyethylene armchair

for open spaces, for shady gardens or simply for the home. Its enveloping shape is reminiscent of a flowering bush; the embossed floral decorations are a hallmark of the Dutch designer. This sculptural piece unites attractive decoration with excellent quality and versatility.

116| O-ZON
Kris van Puyvelde, Royal Botania
 Look up at the sun, and you will realize where we got our inspiration for the O-Zon range. When struck by its blinding appearance, just put on your sunglasses.

117| ISLAND SOFA
Francesco Rota, Paola Lenti
 Modular seating system for outdoor environments. The structure, made of cataphoresis treated steel with polyester varnish, is upholstered with Rope fabric. The visible parts are made of brushed AISI 316 stainless steel. Cushions and pillows
